

SONAM KUMARI

FULL STACK DEVELOPER

Ahmedabad, Gujarat | +91 97712-30830 | [LinkedIn](#) | [Github](#) | sonamjha1075@gmail.com

SUMMARY

Computer Engineering undergraduate with 1+ year of experience in software development, AI/ML, and full-stack engineering. Experienced in building scalable applications, solving technical problems, and adapting quickly to new tools and technologies. Passionate about creating practical, high-quality solutions and contributing to impactful software projects.

TECHNICAL SKILLS

Languages: Python, JavaScript.	Frontend: React, HTML, CSS, Tailwind CSS
Databases: MySQL, MongoDB	Backend: Node.js, Express.js, REST APIs
Concepts: AI/ML, Authentication, Full-Stack Development	Tools: Git, GitHub

PROFESSIONAL EXPERIENCE

WAY2REACH, Full Stack Developer

APRIL 2025 - MARCH 2026

- Built and integrated full-stack web applications using React.js, Node.js, Express.js, and MongoDB, covering frontend, backend, APIs, and testing.
- Developed scalable RESTful APIs and managed database operations to ensure smooth data flow between frontend and backend systems.
- Created responsive UI components, product flowcharts, and wireframes to define user flows, feature logic, and project structure.
- Contributed to AI/ML-based internal tools, including a company chatbot, PDF extraction workflows, and automation features.

ACTWYSE, FULL STACK DEVELOPER INTERN

SEPTEMBER 2023 - MARCH 2024

- Learned and applied MERN stack development by building web application features using MongoDB, Express.js, React.js, and Node.js.
- Developed responsive frontend interfaces with HTML, CSS, JavaScript, and React.js, focusing on usability and clean component structure.
- Assisted in backend development, API integration, testing, and performance optimization to understand complete full-stack application workflows.

RAREBEE LIFESCIENCES, FRONTEND DEVELOPER INTERN

JUNE 2023 - JULY 2023

- Developed a responsive frontend website using Next.js, JavaScript, HTML, and CSS, following a mobile-first approach for better usability across devices.
- Improved user experience by implementing clean UI layouts, basic SEO practices, cross-browser compatibility, and performance-focused frontend optimizations.

PROJECTS

Talk to DB — AI SQL Assistant

Tech Stack: FastAPI, Python, LangChain, Ollama, ChromaDB, SQLite, React, Tailwind CSS, Docker

- Built an AI-powered SQL assistant that allows users to query Company Data in natural language and receive real-time database results.
- Implemented a LangChain-based SQL agent with ChromaDB schema retrieval to select relevant tables before generating SQL queries.
- Added read-only SQL guardrails to block unsafe operations such as DROP, DELETE, UPDATE, and INSERT.
- Developed a terminal-style React interface with generated SQL logs, command-style input, and formatted result display.

The Library — AI Study Partner

Tech Stack: Next.js, React, TypeScript, Tailwind CSS, Zustand, FastAPI, Python, Supabase, pgvector, Groq/Ollama

- Built a voice-enabled AI study platform with multiple learning modes, including Peer, Tutor, Examiner, and Feynman-style explanations.
- Implemented RAG-based note retrieval using Supabase PostgreSQL and pgvector to provide grounded answers with source citations.
- Added voice interaction, always-listening study mode, weak-topic tracking, and gamified streak-based learning features.
- Developed a full-stack architecture with a Next.js frontend, FastAPI backend, Supabase Auth/RLS, and cloud deployment support.

NPS Sentiment Analytics Dashboard

Tech Stack: Python, Streamlit, Supabase, Groq, Gemini, Presidio, spaCy

- Built an AI-powered dashboard to process NPS feedback and perform aspect-based sentiment analysis using LLMs.
- Integrated Supabase data ingestion, PII redaction, toxic-promoter detection, interactive filters, heatmaps, and CSV export.

Generative Studio — AI 2D & 3D Asset Generator

Tech Stack: FastAPI, Python, React, Vite, Three.js, React Three Fiber, Fal.ai, Stability AI

- Built a web-based generative studio for creating 2D images, sketches, and 3D assets using cloud-based AI APIs.
- Integrated text-to-image, sketch-to-image, background removal, text/image-to-3D generation, live preview, and asset download support.

EDUCATION

Bechelors of Technology In Computer Engineering	2021-2025
INDUS UNIVERSITY, AHMEDABAD
